Letter of Recommendation

To

Whom It May Concern

I am Dr. Dinesh Singh, Assistant Professor at School of Commuting and Electrical Engineering, Indian Institute of Technology Mandi, India. Indian Institute of Technology (IIT) are the top tier government funded research institutions in India. At IIT Mandi I am heading Visual intelligence and Machine Learning (VIML) research group. My group is mainly working on the computer vision and machine learning areas with application to surveillance video analytics and biomedical imaging.

I am writing this letter in my capacity as the Faculty Adviser of **Mr. Naman Khatak**, a third-year undergraduate student of the **B. Tech (*Data Science and Engineering*)** at the IIT Mandi. I know him since the beginning of his undergraduate studies and taught him Data Structure and Algorithm, and NLP courses. During this period, he has maintained a satisfactory academic engagement and has conducted himself responsibly with respect to academic and institutional requirements. In my interactions with him as his Faculty Adviser and teacher, I have found him to be respectful, communicative, and receptive to guidance when required.

Mr. Naman has expressed an interest in gaining exposure to technical and research-oriented work as part of his academic development. He appears motivated to learn through practical experience and is at an exploratory stage in identifying his long-term academic and professional interests. As a student, he has not raised any academic or disciplinary concerns and has interacted professionally with faculty and peers. I believe that participation in a structured internship or training environment would be beneficial for his learning and overall growth.

I strongly and without reservation recommend **Mr. Naman Khatak** for the Research Internship program at RBI.

Thanks

Regards,

12/01/2026

Dr. Dinesh Singh
Assistant Professor
School of Computing & Electrical Engineering
